Stütz- u. Wandmauern in  
Trockenmauerwerk

## Trockenmauern Murs de pierres sèches Muri a secco

The diagrams show cross-sections of stone walls. The left diagram shows a wall with a maximum height  $H_{max} = 10\text{ m}$  and a top width of  $0.7-1.2$ . It features a stone arch (Steinhinterbeugung) and is labeled 'lofrecht'. The right diagram shows a wall with a maximum height  $H_{max} = 10\text{ m}$  and a top width of  $0.7-1.2$ . It also features a stone arch (Steinhinterbeugung) and is labeled 'lofrecht'. A formula  $S = 0.30 + \frac{H^1}{10}$  is shown. Other labels include 'min 0.60' and 'Fels'.
